CHAPTER 8
Sustainable Development
Define: Sustainable development

Noun: economic development that is conducted without depletion of natural resources.

World Commission on Environment and Development in 1987, which defined sustainable development as:....Brundtland Report:

"Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs."
Sustainable development

inclusive, sustainable and resilient future for people and planet.
For sustainable development to be achieved, it is crucial to harmonize three core elements: economic growth, social inclusion and environmental protection.

These elements are interconnected and all are crucial for the well-being of individuals and societies.
