Topic 9

Critical Review of Literature
What you need to do?

- Review the most significant and relevant research on your topic.

- Show how your findings and related theories developed are related to research done before.
Critical Review of Literature

- Provide foundation on which your research is build.
- Provide understanding about the theory, previous research and trends that have emerged.
- Deductive approach – develop theoretical and conceptual framework to be testes using your data.
- Inductive approach - do not start with a pre-determined theory.
