EOH3101 – PRINCIPLES OF ENVIRONMENTAL HEALTH
Semester II 2014/2015 Session

ASSIGNMENT I (10%):

Cancer: On the increase

Write your assignment according to the format below:

Part A: Information
A. History and evolution
B. Environmental factors contributing to cancer
C. Signs and symptoms
D. Prevention and Treatment

Part B: Answer these questions:
1. What is lifetime risk? Why is lifetime risk higher in men than women?
2. What is the association between old age and cancer?
3. A cancer research institute in the UK has said that one in two people born in that country will be diagnosed with some kind of cancer during their lifetime. In 1975 it was one out of four people and in the 1990s it has risen to one in three, and by 2010 it was four out of ten. Why is there an increase? Please elaborate.

Format for assignment:
1. Single spacing
2. Arial 11 point font
3. Max 10 pages
4. At least 10 references (please refer to books and articles, less on websites)
5. At least 5 pictures
6. Last day for UPMET to receive this assignment: 21 March 2015

Warning: Please DO NOT cut and paste.

Thank you.
